Tark Technologies LLP.

Round 1 - Online test

Section 1 - MCQs related to HTML, DS, C, Java, SQL etc.

Section 2 - MCQs in which you have to find the answer from the given paragraph.

Section 3 - Two programs of problem solving:

1) **Problem Statement:** Alice wants to give a pizza party to his friends. But he wants to invite as many friends so that everyone gets maximum pizza and does not have to cut the pizza. Some of his friends are already present in the party. So now given the number of pizzas and the number of available friends and you have to find the sum of the digits of the total number of friends (so that everyone gets maximum pizza and that too without cutting or making slices of the pizza).
Example:
Input: pizza = 24, friends = 10
Output: 3
Explanation: available friends is 10 hence alice needs to invite two more friends so that everyone can get 2 pizzas. therefore total number of friends will be 12 and 1 + 2 = 3.

2) **Problem Statement:** Given an integer n. You have to find sum of total number of commas in the numbers from 0 to n. Each number has comma in it after every three digits from right to left. e.g. 12,234 and 785,412 have one comma while 4,525,670 has two commas.
Example:
Input: n = 1010
Output: 11
Explanation: numbers containing commas from 0 to 1010 are 1,001 1,002 1,003 ... 1,010. Hence total commas are 11.

Section 4 - OOP question

- Implement functions for calculating different shapes perimeter.

Section 5 - SQL query

- Query related to GROUP BY, JOIN, ORDER BY and WHERE clauses.

Round 2 - Real life problem (hand written):

- Given a problem statement and you have to write Data Structures and necessasry classes required for solution of the problem; initialization and Algorithm of the solution.

Round 3 - Technical Interview - 1:

1) Give me Introduction about yourself.
2) Modification in the question asked in round 2 and after modification what will be the changes in the Data Structures and necessasry classes that you defined in your solution?
3) Questions regarding the projects
4) What is Greedy Approach?
5) Difference between Greedy approach and Dynamic Programming Approach. Which of these two do you prefer while solving the particular problem and why?
6) Disadvantages of Recursion. And how to overcome them?
7) What is the difference between HashMap and HashSet?

Round 4 -Technical Interview - 2:

1) Give me Introduction about yourself.
2) In which languages do you have expertise?
3) Differences between SQL and MongoDB
4) In a MongoDB collection, the details of employees are stored in an array in the employee key. Each element of the array holds an object that contains the employee's name(string) and skills(array of objects). The skills array stores the programming languages it knows(string) and its ratings out of 10 corresponding to each language(int) as an object. Write a MongoDB query that gives the count of employees using the most programming languages, the name of that language and the details of each employee.
5) If the same details I want to store in SQL then What is the schema of it and how many tables it requires to store such data? Which columns will become primary keys and which columns will become foreign keys?
6) Write a query in SQL to do same task.
7) Questions Related to Computer Networks:

		i)	When you sent a request to any website (say for example: www.google.com) then how would the browser knows that which website to be render?
		ii)	What is OSI model?
		iii)	What is TCP/IP?
		iv)	What is IP address? Explain Uniqueness of IP addresses.
		v)	Difference between IPV4 and IPV6
		vi)	What is DNS?
		vii)	What is HTTP, HTTPS and FTP?
		viii)	Client-Server Communication cycle
	Round 5 - HR Interaction:		
	1)	Give me Introduction about yourself.	
	2)	Discuss your family background.	
	3)	Why did you select Computer Engineering?	
	4)	What or Who is your inspiration?	
	5)	How do you motivate?	

	silver touch
	Round 1:apti + techanical Mcq (online round)
	1.aplitude mcqs
	2. oop concepts, basic sql, programming conceps etc.
	3. two programs
	1.String or pattern maching,sliding window problem,reverse given arry etc.
	2. implement OOPs concepts in program.create classes and their objects for implement predefine functions.
	Round 2: Technical Interview
	Note: they mainly ask qution based on what you write on your resume.
	1.SQL : join query, rollback and commit query and other basic queries.
	2.tic-tac-toe code for two player and one player.
	3.create components in react, backend using javascript(Node js).
	4.programming problems mediam and hard level.(DP, recursion, Backtraking , DSF-BSF, two-pointers etc
	5

TATVASOFT

Note: All below mentioned details are about technical field only - .Net/Node/Java /PHP/iOS/Android/React/React Native

Its not for QA/Design Field.

Total Round - 3

Round_1_Online test

Total 80 mcq (negative mark system - 50% or 100% for each wrong answer based on the questions)

There is 1 or 2 marks MCQ questions

35 mcq - Aptitude

35 mcq - Reasoning

10 mcq - Techninal (Basic about language & Sql queries)

Round_2_Technical Interview

(Note: Dont use Programiz website for online compilation as it generate Wrong output in some case. Use other online compiler instead.)

Asked 3 aptitude question

Introduction | Basic About Any one language| Basic programs of String and array | OOPs Concept | Patterns Programs | Dbms & Sql queries | Projects | Logical Reasoning Questions

Note :- Here also do program of patterns with recursion also, DBMS basic to TABLE Joins.

Pattern Programs in any language:
Asked patterns
1
2 3
4 5 6
7 8 9 10

1
3 2
6 5 4
10 9 8 7

Refer: https://www.programiz.com/c-programming/examples/pyramid-pattern for more patterns
https://www.geeksforgeeks.org/pattern-programs-in-c/

GATEWAY

Total Rounds: 4

Round 1: Aptitude Test (Online Assesment)

Topics:- 1. Mathematics and resoning
2. English + Grammar
3. Questions related to Git and Github

Round 2: Technical Coding Test (Online Assesment)

Topics:- 1. Frontend Programming
-> Toggle Button (https://medium.com/@nishaadequate123/toggle-button-in-react-js-technical-chamber-644475687eb0)
-> On click increment number (https://stackoverflow.com/questions/9186346/onclick-increment-number)
2. Backend & Database
-> Simple SQL Query using 'where' and 'sum()'
-> Removing null and empty data from the given string using C# (https://www.techieclues.com/blogs/how-to-convert-a-string-to-json-object-in-csharp)
3. DSA Question
-> Nested Dom Elements (https://stackoverflow.com/questions/62462345/how-to-check-if-dom-elements-are-correctly-nested)

Round 3: HR Round

1) Introduce your self (asked include family details).
2) Why you want to do this job and not do master or do you have any thoughts for masters
3) What you like about gateway which made you apply for the job
4) You have done internship so dont you think you should ask them to give you full time role why you are applying here.
5) In your group project have you faced any issue related other person is not doing hid part of task?
6) What will you do if one of your team member not doing his job in company. (you are team member not leader of that team).
7) You know the terms of bond so have you talked to parents and what are your thoughts about this 39 months which include 2.5 years of job apart from internship.
8) Why you want to join us, as you know that you may or may not get stipend during your internship?
9) Had this happened to you, that one of your team member was not able to complete his assigned task ? And how did you handled this situation?

Round 4: Technical Interview

1) Questions related to the projects mentioned in your resume.
2) Have you worked on other technology that you have not mentioned in your resume
3) Question related to the technical skills mentioned in your resume

Tips and Suggestions

Practice DSA questions
Try to improve your English speaking skills (Practicing GD with your friends will help a lot)

RKIT | FULLSTACK DEV

Round 1 | Aptitude test

MCQ(pen paper) based aptitude test 1h time / 30 mcq

The following topica are covered in the test

1. verbal aptitude	5. JS basic
2. Questions on **age , time & work , train , profit and loss, % change,**	6. Software Engineering Que(agile models, testings)
3. Pictograph questions	7. CN(basic)
4. oop (java , cpp, c#) , output based que of c lang	8. OS(basic)

Round 2 | Personal interview (hr + technical)

1. introduce yourself	8. what makes you different from others
2. hobby and all	9. js dom que + onclick que
3. basic oop in java	10. **.NET** / **C#** que
4. sql queries for creating views / cursors / trigger	The interview was extensive, covering numerous topics

5. one pattern que (numeric triangle ends with *) don't muggup coz pattern que can be anything following which I got personally

6. code to connect db with api (I did it with php + mysql)

7. future plans and goals along with scenario based que

Round 3 | Descriptive test 13 que 45min time

1. difference btw free() and delete() in cpp	7. one que from CN
2. sql query for CRUD operation	8 OOP based que
3. write a code to implement stack(push , pop) with linked list so you first have to code linked list and than make stack	9. diff b/w user thread vs kernel thread
4. how merge sort works , with example	10. shortest time remaining first vs shortest job first serve
5. how quicksort works with example	11, 12, 13. Unable to recall
6. about agile and its process models	

Round 4 | Technical round at RKIT office [1hr 30min]

To implement banking console app using programming lang (Java, C++, C) [No use of internet or external libraries and time bounded]

https://github.com/KHUNTPRIYANSH/rk_que

Round 5 | Panel interview

uestions about my background, prior work experience, interests, and other personal details, along with more in-depth technical questions similar to those in the previous roun

TSS Consultancy Private Limited

Round 1 | apti test online (3 sections)

1. oop 10 mcq 2. apti 30 mcq, 2 technical que (any programming language)

following are que for 3rd section (coding)

1. return all the palindromes from the given integer arrays		7
2. * pattern que(triangle)		8
3. gcd , lcm		9
4. pascal triangle		10
5		11
6		12

Round 2 | personal technical interview (takeen by junior devloper)

!!! Remember you cant use lib in those technical que not even java collection framwork , c++ stl , builtin sorting searching swap reverse algo and not even string in c++/c so be prepared for it

1. merge two sorted array (you can only use 1 loop you don't have to print just sort both array)		7
2. reverse words in string (ex. Given "today is Sunday" make it "Sunday is today") [you cant use string , stringsteam method in c/cpp so you have to do it with char arr]		8
3. josephus problem [https://www.youtube.com/watch?v=46zD5d9y9b4&t=365s]		9
4. given an array you have to find elements having highest frequency in an array, if multiple return -1		10
5. difference btw primary , null , unique key + some queries related to join and all		11
6. encode string [ex: make string aaabbceff to 3a2b1c1e2f]		12

Round 3 | technical interview #2 at tss office offline

1. oop or dbms related basic que		6.Given an array of words and a long string, determine if the long string can be formed by concatenating words from the array
2. implement dynamic method dispatching + multiple inheritance within single code		7
3. making change [DP]		8
4. josephus problem		9
5. same prefix suffix in string(like KMP Algo)		10

	position : **1) React Native dev.** **2) c#.net developer**	Frontend Topics: HTML,CSS,JavaScript (JS),jQuery,ReactJS,Next.js Backend Topics: C,C++,Java,Node.js,Object-Oriented Programming (OOP) Concepts Database: Mysql,Sql,MongoDb
	No round Only Interview and Question **Step1: Give Points to your ability out of 10** **For Example : For Frontend (7 out of 10) , For Database (6 out of 10) , For Backend (8 out of 10) Based On Your Ability**	
	Questions asked based on your Points given for above field --> if you gave more points for backend then most questions from backend related	
	Question 1: What is the difference between creating a foreign key relationship and using a join to combine two tables? Is a foreign key required when joining two tables? What is the purpose of each approach, and how do they differ in implementation?	
	Question 2: How does React work when passing data between parent and child components, or vice versa? How can this be achieved, and which techniques, states, or hooks are used for such implementations?	
	Question 3: What is the difference between abstraction and encapsulation?	
	Question 4 : How Typescript work?	
	Question 5 : Explain the Difference Between Abstract Classes and Interfaces. When Would You Use Each?	
	HR Related Questions :	
	Question 1: Tell me something about your self?	
	Question 2 : If sometimes there are mistakes on your side, and you need to complete the task overnight, what should you do?	

ProminentPixel (Jr. Software Engineer)

Round-1 (Technical)

Tell me about your self.
Questions related to projects.
Difference between let,const and var.
What is hoisting?
What are higher order functions in javascript?
What is promise?
Difference between synchronous and asynchronous programming.
What is use of usestate and useeffect?
Write a program to print sum of diagonal elements of matrix.
Swap two numbers without third variable.
Write a program to print fibonacci series.

Round-2 (Technical)

Questions related to projects.
What is jsx?
What is react and use of it.
What is map,filter and reduce?
What is hooks in react ? Explain any two hooks.
Which are four main pillars of OOP?
What is polymorphism?
What is inheritance and its types.
Why is string immutable ?
Write a program to print pattern.
Write a program to print prime numbers between1 to n.
Write a program to factorial of a number.

Round-3 (Technical)

Questions related to projects.
What is objects in javascript?
Difference between synchronous and asynchronous programming.
What is callback ?
What is async/await?
What is API?
Questions related to sperad and rest operators.
What is props in react ?
What is usecontext and what was need of it?
What is redux and how it is different from usecontext?
What is routing in react and how to implement it?
What is interface?
Write a program to check wheather linkedlist is circular or not.

Round-4 (Technical)

Tell me about your self.
Family background
How was the interview experience till now?
Describe this year election in 15 to 20 sentences.
How to solve the problem of climate change?
Write a program to print charcter which repeates more than n/k times in a given string.
Write a program to find the second largest element of the array without sorting the array.

IMPROWISED TECHNOLOGIES

Total 8 rounds for SE, 9 rounds for DevOps, 8 rounds for APS

Round - 1 Aptitude

mixed questions of Aptitude and Reasoning

Round - 2 Open Handed Q-A

Questions related your project and Programming languages you know
also there were some moral questions to chech your thougth process
beware and be honest in this as it would be checked during your technical and HR interview and questions may be asked from it

Round - 3 Practical Test

Hacker Rank question - 501 darts
in this type of questions, achieve as many successful testcases as possible and don't leave it

Round - 4 Group Discussion

topics
Social Media - boon or bane
OTT vs Cinema
Online money vs Offline money

Round 5 and 6 were different for each role (DevOps interview has 9 rounds)

Round 5(SE) - Technical Interview

SQL concepts like join, group by
OOPs concepts like inheritence, polymorphism, encapsulation
basics about language mentioned in resume
project related questions
questions related to technical domains of company
Fibonacci series
DSA questions and difference between linear and non-linear data structures
How to implement Linked List in java without collections framework
explain indexing in SQL
explain real world examples of data structures
how to implement queue/stack with linked list/ tree
Explain difference between class & objects, static classes, class variables, instance variables

Round 6(SE) - Code Conversion

you were given a solution in some language that you may know or not know but you have to solve it again in the language that you are not knowing
you can access the internet in this round

Round 5(DevOps) - Technical Interview (same as SE role)

Round 6(DevOps) - Code Conversion (same as SE role)

Round 7(DevOps) - Deployment

You were given some new tool for code deployment like github and you have to perform updation, deletion, rebuild like tasks with it througth terminal

Round 5(APS) - Technical Interview

Common technical questions like SE role and situation based technical questions

Round 6(APS)

You were given some random topic and you have to make brief report and send it to the specified person and you can access internet

Round 7 - conversation with executives

why you studied computer engineering?
why you choose GECR?
Would you like to recomend GEC to juniours?
what is your family background?
what do you do in your free time?
explain anything in which you are having deep knowledge
why do you choose our company?
how was the interview process till now?(it was the first question)
resume related question
what do you think where do you leg in this interview?

Round 8 - HR round

how was the interview process till now?
tell me about your family background
what is your goal in next 5 years?
what do you know about company?
questions related to project(s)
What did you learn from this interview?

TechXperts

Round 1 Aptitude Round

Aptitude (reasoning, maths, coding & programming Questions)

Round 2 Technical Round

let var const difference

how to access the second element of array

entry control and exit control loop

class and object based on pn real life scenarios

what is used of encapsulation(explain with used in project scenario)

what is used of parent class and child class. why should we use inheritance

Pascal triangle of Fibonacci series pattern

difference between GET & POST

Form Submission(request & response)

doc will update soon..

Einfochips - An ARROW Company

Round 1 - Online test

Section 1 - MCQs related to Aptitude & Reasoning, DS, C, Java, SQL etc.

Section 2- DSA Question (Easy to Moderate level)

ex: https://leetcode.com/problems/watering-plants/description/

Total 45 Mcqs

Round 2 - Technical Interview

1) Give me Introduction about yourself.
2) Question from your resume (about your project & technology)
3) Frontend question (basic of html & css)
4) Some basic sql and oops question.

Round 3 - Technical Interview

1) Give me Introduction about yourself.
2) Basic Pattern Question
3) Your Appraoch that used by you in DSA question.
4) Advance SQL & OOPs question
5) Question about differnt technology that you mention in resume

Round 4 - HR Round

1) Information about family.
2) check family background and your loyality for an job.

E-Sparkbiz

Round 1 - Online test

Aptitude + Reasoning + English + Data Structure + DBMS

Total 60 MCQs No negative marking

Round 2 Coding Round (pen-paper)

Write a program to reverse the elements of an array.

Implement a recursive function to print the Fibonacci series up to a certain number.

Check how many times each character appears in a given string.

Round 1 Aptitude (online)
Aptitude + Reasoning + English + Data Structure + DBMS
Round 2 Coding Round (pen-paper)
Revere Array Program
Print Fibonacci series using Recursion
Check occurrence of each character in Strin
Find second largest element in array
Fnd Intersection in two arrays
Find Vowel and constant in given String
Print 1 to n prime numbers
Using 2 variable to swap numbers
Print Pattern
check given number is palindrome or not.
check given string is palindrome or not.
Round 3 Technical Interview
Ask on Coding Round Program
What are the 4 pillar of oop? and Explain about it.
What are the join and write an basic query of that in paper.
What is Data structure?
Diffrent types of data structure.
What is Stack?
what is Queue?
what is Linked List?
What is sorting Algorithms and its types.
Pesudo Code and Logic of Selection sort, Insertion sort, Bubble sort, Quick sort, merge sort
What is databases and its types.
They give us Table and we perform some queries like update, select, joins and its type, insert, groupby, order by, etc.
Diffrent types of Joins and Explain.
What is Encapsulation?
What is Abstraction?
What is polymorphism?
Types of polymorphism?
Method Overloading and method Overriding diffrence.
What is inheritance?
types of inheritance.
React hooks? if you metioned in resume and in your project.
Questions About Project.
Exception Handling.
Round 4 CTO Round
Tell me about yourself
What is your oop (Specially ask on Static Keyword)
What are 4 main pillar of oop and explain it with real time example
What are you learn excluding coding ?
Round 5 HR Round
Discuss about Norms of the Company
Discuss about the salary and bond duration

Round:1 aptitude test
aptitude + technical mcqs+Database mcqs
Round-2 technical interview
Frontend interview
html tags like <meta>,<link>,<iframe>,<script>,<video>,<audio> etc
Semantic tags in html
types of display property and difference between them
visibility,text-decoration,outline,border
various properties of animations like timing-function,keyframes delay,shorthand of animation
types of position and difference between them
explain box sizing , media queries
what is tailwindcss?
list out any 5 classes of tailwindcss
some questions on material ui
difference b/w const,let,var
closures,hoisting
async/await,promises
was asked to write code for some DOM manipulation.
React hooks like useState,useEffect,useReducer,useMemo, useCallback in detail
prop drilling in react
benefits of redux over use context
need of redux
Fragments in react
real dom v/s virtual dom
question about routing
They asked based on the ratings given by ourselves among the technologies mentioned in the resume.
Round 3 - HR round (in office)
tell me about yourself
why should we hire you?
some technical questions
difference between for loop and while loop
sort array in descending order in single loop (without prebuild functior
etc
Backend Developer
Round 1 Aptitude Aptitude + Reasoning MIx questions + sql + java code mcq

Round 2- Personal Interview Round Introduce Yourself OOP What is OOPs & 4 pillars of OOPs? What is Polymorphism & Explain realtime use of method overloading & method overriding? What is Inheritance & Explain with realtime example? What is Abstraction & Explain with realtime example? What is Encapsulation & Explain with realtime example? What is difference between Abstraction and Encapsulation? static, super,final keywords							
SQL what is join? types of join what is groupby? use of groupby what are Aggregate Functions? What is diffrence between where and having what is sql injection? what is difference between delete , drop and truncate?							
Program(Pen - Paper) simple if else program reverse number pattern CTO + HR 1.SQL query : find 3rd largest salary from given table 2.Sort Array (Using one loop) 3.Family Background							

SAMPAARSH TECHNOLOGY

They wanted persons having strong skills in applied mathematics, trigonomatry and 2D-3D visualization

Total round : 4

Round 1:

Applied mathematics and trigonomatry based 15 apptitude questions.

Round 2: technical round

There were total 10 questions given to solve in 1 hour you can get the best as per your ability.

1.calculate the sum of first n natural numbers(1mark)
2.check if given string is palindrome or not(1 mark)
3.check if given number is prime or not(1 mark)
4.program to find LCM of two numbers(1 mark)
5.print fibonacci serise upto n(3 marks)
6.transpose of given matrics(3 marks)
7.selection sort - sort the array(3 amrks)
8.program to remove duplicate from the array(3 marks)
9.program to find the median of two sorted arrays(7 marks)
10.check if a string containing parenthesis is balenced or not using stack.(7 marks)

Round 3:

This was technical round and the topics asked like basics of java and OOPs concept in depth and somewhat AJP.
This was technical round and the topics asked like basics of java and OOPs concept in depth and somewhat AJP.

Round 4:

personal interview round - only personal details were asked.

Silent Infotech

Total rounds: 3

Round 1: Aptitude test (Online Assesment)

1. MCQs related to aptitude and reasoning like direction,pattern,etc with time limit for each question
2. Five to six programs like:
   1) Best to buy and sell stock
   2) Median of two sorted array
   3) The sorted array is given in which every number is repeated twice except one number, find that number

Round 2: Technical coding test

1. Design a database for hospital management system
2. How web works and what is DNS
3. OOPs questions
4. Questions about your project
5. DFS and BFS
6. Check whether a number entered by the user is divisible by 4 or not without using modulo and divide operator
7. Layers of OSI model and TCP/IP

Round 3: HR + Technical

1. Introduce your self
2. Design a database for college management system
3. Linear search and Binary search
4. Different types of sorting
5. Implement any one sorting
6. There are two array if the addition of any two elements from first array is present in second array then print the two elements of first array
7. Why you selected GEC Rajkot
8. What do you know about Silent Infotech
9. Why do you want to join Silent Infotech
